### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: After a review of the prior art of record, it is believed that the present invention is novel and non-obvious wherein no reference discloses a bellows type hydraulic accumulator comprising a shell, a bellows unit, a stay having a communication port formed therein and disposed within the bellows to restrict the degree of contraction of the bellows unit and to divide the liquid chamber into a fixed volume liquid chamber and a variable volume liquid chamber and which communicates with the fixed volume liquid chamber via the communication port and a pipe inserted into the liquid inlet in order to form an inflow passage inside the pipe and an outflow passage outside the pipe, the pipe having a tip end being located within the communication port of the stay with a predetermined radial clearance formed between the tip end and a wall surface of the communication port to enable pressurized liquid to be supplied to the variable-volume liquid chamber from the tip end of the pipe and to be discharged from the variable-volume liquid chamber to the fixed-volume liquid chamber via the radial clearance, as recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
